

CUSTOM CONTROLS

We recognize that increasing laboratory efficiencies is essential. Your laboratory may need a single or unique analyte, where there is no commercially available Quality Control material available. Or perhaps your laboratory may be looking to consolidate multiple controls for single system or even achieve commutability across many systems or locations.

With a true 3rd party Handcrafted Custom Quality Control from UTAK, improving efficiency is a certainty.

UTAK, beyond measure... one test result at a time.

- **Achieve Compliance with Unique and Esoteric Analytes**
- **Expand your Test Volume by Adding Analytes to your Quality Control**
- **Reduce Inventory Costs Through Consolidation**

**CUSTOM
CONTROLS**

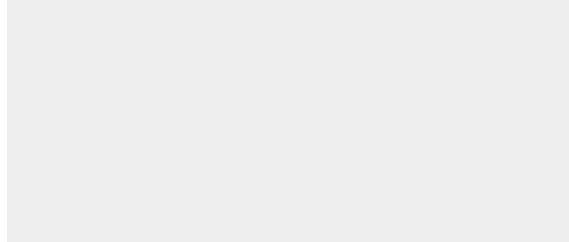

Design the control that best suits the
unique needs of your laboratory.
Specify the components;

- the biological matrix
- the analytes with concentrations
- volume size per vial
- the format (Frozen or Lyophilized)

We will apply our nearly 40 years of knowledge and experience to manufacture the control to your specifications. UTAK backs these products with our exclusive guarantee.
